

CLAIMS

WE CLAIM:

1. A container comprising:

5

complementary panels foldably joined along a hinge member;

at least one tray adapted for receiving at least one item, attached to a respective one of said complementary panels; and

10

locking mechanism for selectively retaining said complementary panels in face-to-face relationship with one another.

2. A container comprising:

15

complementary panels foldably joined along a hinge member;

20

complementary trays attached to respective said complementary panels disposed for alignment with one another when said complementary panels are folded into face-to-face relationship with one another, at least one of said complementary trays adapted for receiving at least one object; and

locking mechanism for selectively retaining said complementary trays in face-to-face relationship with one another.

25

3. The container of claim 2, wherein at least one of said complementary trays including a compartment.

4. The container of claim 2, wherein said complementary trays include respective compartments disposed for forming a cavity when said complementary trays are disposed in face-to-face relationship with one another.
5. The container of claim 2, said locking mechanism comprising said complementary trays having respective engagement members adapted for cooperatively receiving one another when said complementary trays are urged into face-contacting relationship with one another.
- 10 6. The container of claim 5, said respective engagement members comprising said complementary trays having corresponding male and female engagement elements.
7. The container of claim 2, further comprising grasping elements for facilitating separation of said complementary trays from face-contacting relationship.
- 15 8. The container of claim 7, said grasping elements comprising at least one of said complementary trays having a recessed region.
- 20 9. The container of claim 7, said grasping elements comprising at least one of said complementary trays having at least one flange extending along a respective edge of said complementary tray.
10. The container of claim 7, at least one of said complementary trays having a flange extending along each respective non-hinged perimeter edge.
- 25 11.
